SUMMARY

Computer Science Engineering student in Haryana, India seeking a Junior Software Developer or software engineering internship. Coded and shipped a real-time collaborative code editor for 10+ concurrent users using React.js, Node.js, Express.js, and Socket.IO — cutting latency by 60% and load time by 40%. Cracked 130+ algorithmic problems (78 LeetCode, 52 Codeforces) with a 40-day streak. Skilled in Java, C++, Python, JavaScript, REST APIs, OOP, Agile, debugging, and technical documentation. Coached 3 peers in DSA, helping all 3 move up 2 contest divisions within 60 days. Ready to contribute day-one coding skills to a fast-paced engineering team.

SKILLS

Programming Languages: Java, C, C++, Python, JavaScript, TypeScript

Frontend Development: HTML5, CSS3, React.js, Bootstrap, Responsive Web Design

Backend Development: Node.js, Express.js, Socket.IO, REST APIs, WebSockets, HTTP

Databases & Tools: SQL, MySQL, Git, GitHub, VS Code, Linux, Postman, npm

Core Concepts: DSA, Algorithms, OOP, MVC, OS, Agile, SDLC, Debugging, Technical Documentation, Communication, Leadership

PROJECTS

Real-Time Collaborative Code Editor

Jan 2025 – Apr 2025

Personal Project | Tech: React.js, Node.js, Express.js, Socket.IO, WebSockets, REST API, Git

- Coded a real-time collaborative editor handling 10+ users simultaneously with zero data loss, using OOP and MVC patterns to keep the codebase modular.
- Cut synchronization latency by 60% by replacing HTTP polling with bi-directional WebSocket communication via Socket.IO.
- Crafted a React.js UI with live code highlighting and syntax detection; authored technical docs covering all 12 API endpoints and architecture decisions.
- Trimmed codebase complexity by 30% and page load time by 40% by restructuring the Node.js/Express.js backend into a clean MVC architecture.

Competitive Programming & DSA Practice

2024 – Present

Self-Directed | Platforms: LeetCode, Codeforces | Languages: Java, C++, Python

- Cracked 130+ algorithmic challenges (78 LeetCode, 52 Codeforces) across arrays, graphs, DP, trees, and linked lists; diagnosed and fixed complex edge-case bugs.
- Cut average solve time by 35% by systematically practising sliding window, two-pointer, BFS, DFS, and DP patterns over 40 consecutive days.
- Coached 3 college peers in DSA — all 3 improved their contest ranking by 2 levels within 60 days, showcasing clear communication and technical leadership.

EDUCATION

B.Tech – Computer Science Engineering

2024 – 2028 (Expected)

Maharishi Markandeshwar Engineering College, Haryana, India | CGPA: 7.13 / 10.0

Class 12 – BSEB | M.H.K College, Motihari, Bihar

May 2024 | 67.4%

Class 10 – CBSE | C.M.M.H School, Motihari, Bihar

May 2022 | 60.6%

CERTIFICATIONS

- Graph Theory Programming Camp – AlgoUniversity | Mentored by Codeforces Master Manas Kumar Verma | Solved 17 advanced graph problems
- DevArc 2026 – Developer event by Google Developer Groups (GDG) On Campus, MMEC MM(DU) | Jan 2026
- Actively pursuing: Data Structures & Algorithms (Coursera) | HackerRank Certifications | Git & GitHub (LinkedIn Learning)

ACHIEVEMENTS

- Ranked in top 15% of college coders — cracked 130+ DSA problems across LeetCode and Codeforces within 6 months of starting competitive programming.
- Shipped a full-stack real-time web app independently in 3 months — zero external help, complete from design to deployment with full technical documentation.
- Sharpened algorithm speed by 35% through daily structured practice — hit a personal best of 40 consecutive days of coding.
- Coached 3 peers in DSA over 60 days — all lifted their LeetCode ratings by 200+ points, reflecting strong mentorship and clear communication.
